**DETAILED ACTION**

1. Prior office actions are incorporated in this Office Action by reference. Applicant filed a Supplemental Amendment on October 24, 2008.

***Allowable Subject Matter***

2. Claims 1, 3-9 and 11-16 allowed.
3. The following is an examiner's statement of reasons for allowance: see below
4. The closest prior art of record:
5. Non-Patent Literature: Intermediate Accounting, 5<sup>th</sup> Edition by Loren Nikolai and John Bazley.

Nikolai and Bazley teach the computation of primary earnings per share for a complex capital structure by taking into consideration the weighted average of common shares, stock dividends and stock splits.

Other stock equivalents that are considered are stock options and warrants and convertible preferred stock and bonds.

6. In regards to claim 1 the closest prior arts of record when taken either individually or in combination with other prior arts of records fail to teach or suggest:

iteratively calculating, with the computer system, a plurality of values of earnings per share associated with the entity based upon the obtained data and by iteratively changing the value of the stock price associated with the entity, wherein each value of earnings per share is calculated at least in part using the formula:

$$EPS = DPS_0 + \frac{Earnings_0 - N_o \times DPS_0 - Coupon}{N_o + \Delta N_{eff}}$$

wherein:

- i) Earnings<sub>0</sub> equals the input value of earnings,
- ii) N<sub>0</sub> equals the obtained number of common shares outstanding,
- iii) DPS<sub>0</sub> equals the obtained value of dividends per share,
- iv) Coupon equals the obtained value of coupon payments, and

Art Unit: 3692

v)  $\Delta N_{\text{eff}}$  equals the obtained change in the effective number of common shares outstanding, based at least in part upon each iteratively changed value of the stock price associated with the entity and iteratively calculating, with the computer system, a plurality of values of earnings per share risk associated with the entity, wherein the values of earnings per share risk are based upon at least a plurality of different numbers of shares outstanding and an amount of earnings volatility.

7. In regards to claim 9 the closest prior arts of record when taken either individually or in combination with other prior arts of records fail to teach or suggest:

iteratively calculating, with the computer system, a plurality of values of earnings per share associated with the entity based upon the obtained data, wherein each value of earnings per share is calculated at least in part using the formula:

$$\text{EPS} = \text{dividend per share} + \text{retained EPS};$$

wherein dividend per share = the value of the equity dividend/ the number of existing shares; and wherein retained EPS = (earnings without taking effect of any interest expense from the convertible security minus attributed after-tax interest expense from the convertible security) / (the number of existing shares plus the number of attributed shares from the convertible security);

iteratively calculating, with the computer system, a plurality of values of earnings per share risk associated with the entity, wherein the values of earnings per share risk are based upon at least a plurality of different numbers of shares outstanding and an amount of earnings volatility.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
